## INTRODUCTION

This is the seventeenth issue in a continuing series of county farm income reports for North Carolina. Data for 1988 should be considered preliminary. Detailed data similar to those in this bulletin are available for other years beginning with 1970.

The allocation of farm income to counties utilizes information collected by both the Agricultural Extension Service and the North Carolina Agricultural Statistics Division. In addition to basic data generated by these two agencies, numerous other sources are used in developing income estimates: Agricultural Stabilization and Conservation Service, U. S. Department of Commerce, State Milk Commission and others. Thus, this publication represents a combination of information from many sources to develop estimates depicting the status of N. C. agriculture in terms of a common denominator—the dollar.

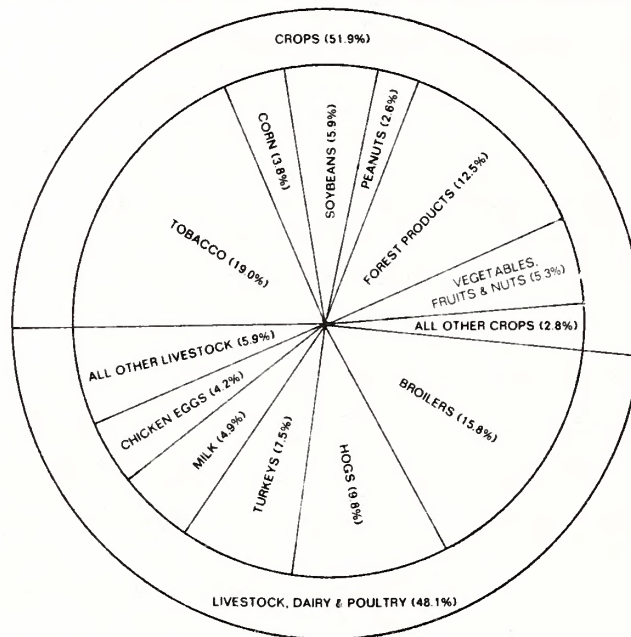

Data in this report should be especially useful in assessing the importance of numerous commodities as sources of farm income. The greater benefit, however, may be derived in using this report to examine the geographical distribution and trends in farm income rather than absolute levels of estimates.

State totals of farm income in this report are the same as published by the U.S. Department of Agriculture and thus are comparable with other states. The state-level estimates were based on data collected and compiled by the National Agricultural Statistics Service, USDA.

<sup>1</sup> Some counties not shown separately to avoid disclosing individual operations. <sup>2</sup> Includes total income from farm and commercial forestry as estimated by County Extension Agents. The portion from commercial forestry is not included in cash farm receipts from farm marketings. <sup>3</sup> This estimate includes both commercial farm ponds and marine seafood. Trout and catfish income from commercial farm ponds was estimated by County Extension Agents. The income from seafood was based on dockside value of the commercial catch at the point of landing, as estimated by National Marine Fishery Service, U.S. Department of Commerce, Beaufort, N.C. District totals do not equal State total to avoid disclosing individual operations.

NOTE: Farm Forest Products are not included in cash receipts, but are now included in other farm-related income.

## CONCEPTS AND DEFINITIONS

Cash Receipts from Farm Marketings represent gross returns from the actual sales of crops and livestock and livestock products during the calendar year. The value of home consumption of farm products and inter-farm sales of livestock is not included as cash receipts. Production expenses such as feed, fuel, fertilizer, marketing costs, and purchases of other inputs are not subtracted from cash receipts. The addition of government payments to cash receipts provides a measure of gross cash income, or total cash receipts from farming.

County estimates of cash receipts reflect farm productivity of the county to which the income is assigned. For example, livestock produced in one county but sold in another for immediate slaughter are credited only to the producing county. Similarly, income from crops is credited to the producing county even though the crops may be stored, processed and marketed in another.

Cash receipts from marketing of crops is the final product of several underlying estimates: acreage and yield, the percent of total production sold, price, and changes in inventories.

The estimated percent sold based on survey data from individual farmers is applied to the total production for each crop for each county. Estimates of prices for crops for each county are based on reports from farmers and buyers of farm products.

For several field crops, especially corn, soybeans, and cotton — where portions are carried over — the calendar year cash receipts are not to be compared with crop year value of sales or value of production. Calendar year cash receipts from such crops represent sales of parts of production from two or more crop years. For crops where all or nearly all the production is harvested and marketed within a single calendar year, the cash receipts are essentially the same as the value of production.

Receipts from "Other field crops" include oats, barley, rye, grain sorghum, hay, seed crops and miscellaneous field crops. The value of grain crops used on the farms where produced is not included in these income data.

Receipts from "Vegetables, fruits, nuts, and berries" include a wide array of horticultural or truck crops. Statewide, the most important income sources in this category are: sweet potatoes, cucumbers, apples, snap beans, potatoes, tomatoes, peppers, cabbage, and peaches.

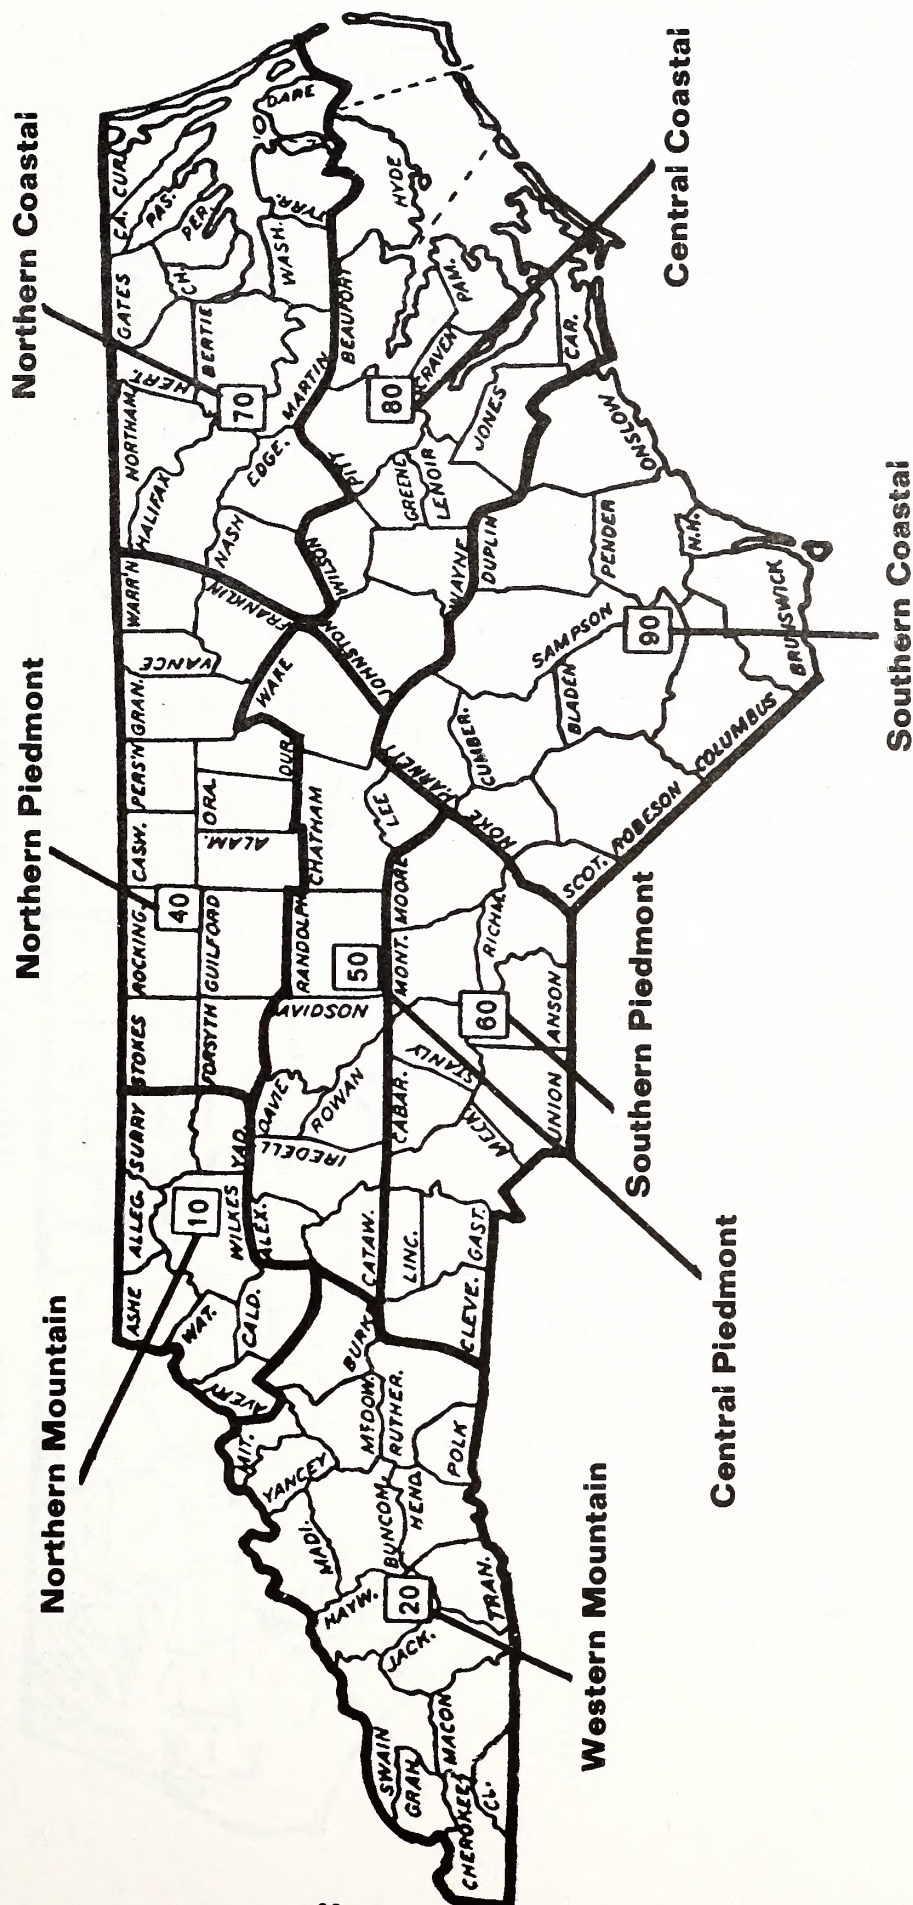

"Farm forest, greenhouse and nursery" includes sales of pulpwood, timber, Christmas trees and forest products from farm tracts only. Cash receipts from farm forestry are restricted to the value of products sold from woodlands associated with general farming operations. Essentially all income is excluded from farm cash receipts if it is derived from public-owned forests, woodland tracts owned by institutions and public utilities, holdings of paper, pulp, lumber and other wood products companies, and large privately-owned woodland tracts that are not part of a general farming operation. Nursery and greenhouse includes ornamental shrubs and trees, flowers grown outdoors and many types of flowers, ornamentals and plants produced in greenhouses for commercial sale.

The annual cash receipts from farm marketings of livestock and livestock products also refer to the calendar year. Receipts include the sales value of an animal only once, usually the value at the time it is sold for slaughter or final disposition. Since some livestock move from county to county at various stages of growth, the value assigned to the county is based on a "value added" concept. Each county is given net credit for the portion of the final value originating within its boundaries.

These income data do not exactly represent the summation of all income received by livestock and poultry producers in a given county. For example, feeder pigs or cattle sold from one farm to another within a county are included only upon final disposition. Also, where commodities such as broilers are produced under contract, the farmer may directly receive only a contract payment. However, these data include the full value at the farm level of the poultry sold.

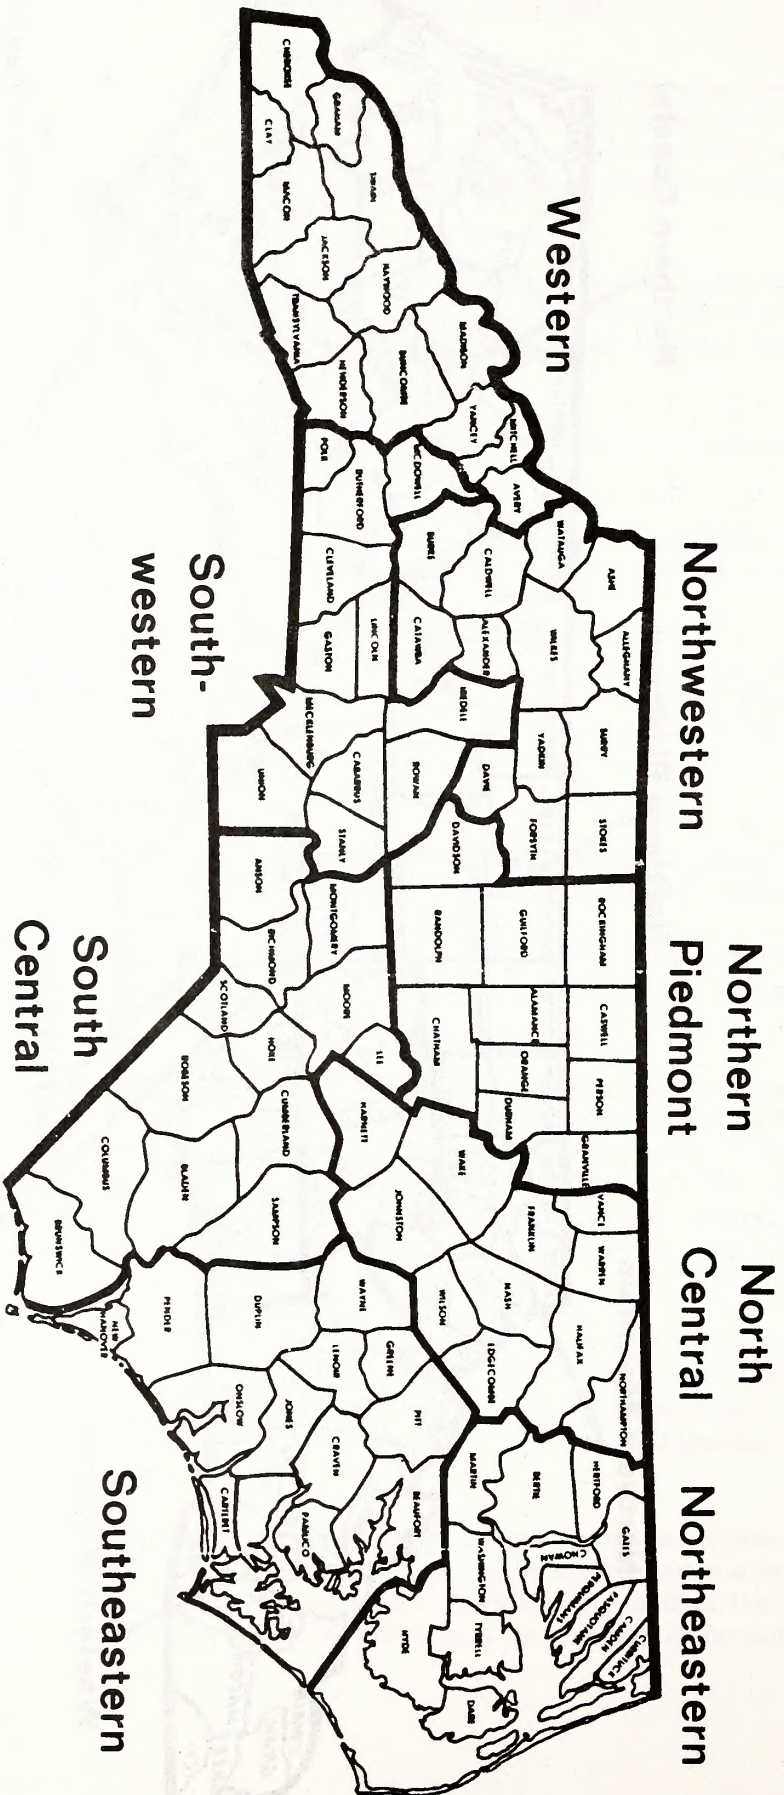

# NORTH CAROLINA AGRICULTURAL STATISTICS DISTRICTS

# NORTH CAROLINA EXTENSION SERVICE DISTRICTS

North Carolina comprises eight Extension Service Districts as depicted on the map. Cash receipts and government payments are summarized by these Districts on pages 18-19. Income from forestry and seafood is shown on page 20 by counties listed alphabetically within these Districts.
